

CJET White Paper

Abstract

CJET is the first cryptocurrency dedicated to a single skateboarding moment: Chris Joslin's legendary 360 flip down El Toro 20. This project celebrates skateboarding history and uses blockchain to give back to the skate community in a transparent, community driven way.

The Problem

Skateboarding should be about freedom and creativity but for most skaters it comes with constant struggle. The price of boards trucks shoes and gear keeps climbing while most skaters are barely making money from sponsors if they have one at all. Every session comes with the risk of injury and most skaters do not have health insurance. When someone gets hurt they are forced to pay out of pocket or set up a GoFundMe hoping friends and strangers will help. At the same time the skate industry makes millions from the culture while very little of that money makes its way back to the skaters who built it. CJET was created to change that dynamic and give skateboarders a way to support each other directly.

Vision

CJET aims to flip that narrative. By using crypto we can create transparent wallets that support skaters directly fund new skateparks give boards to kids help injured skaters pay medical bills and reward the culture that inspired this coin. As CJET grows the goal is to make it a bridge between crypto investors and the skateboarding world giving everyone a way to support the community and benefit together.

How CJET Works

CJET is a Solana token that anyone can buy hold or donate. The project is built around four primary public wallets:

1. Chris Joslin Wallet – a tribute wallet for the skater who inspired this project. Anyone can donate to this wallet to support Joslin.

2. Boards for Kids Wallet – funds are used to buy skateboards for kids who can't afford them.
3. Skatepark Fund Wallet – supports building and repairing skateparks with a goal of partnering with nonprofits like The Skatepark Project.
4. Injury Relief Wallet – used to donate to verified GoFundMe campaigns for injured skaters each month with distributions announced publicly.

Each wallet is public and trackable on Solscan ensuring full transparency.

Founders Pledge

One percent of the founders personal wallet is allocated monthly and split evenly between the three community funds Boards for Kids Skatepark Fund and Injury Relief. This percentage will be reviewed every three months and may be adjusted to ensure the long term sustainability of the project as CJET grows in value. All transactions will be shared publicly with Solscan links for community verification.

Roadmap

Phase 1:

Token launched and graduated on Pump.fun

Website live with all four donation wallet addresses

Telegram and Instagram community launched

DexScreener info submitted

Phase 2:

Lock fifty percent of the dev wallet for ninety days

Begin monthly founder contributions

Launch first board giveaways injury relief payments and skatepark fund initiatives

Phase 3:

Collaborate with brands to host events and create awareness

Partner with skate nonprofits to support park builds and repairs

Begin documenting monthly contributions publicly

Phase 4:

Explore community voting on which skateparks or GoFundMe campaigns receive funding

Release limited edition CJET merch and boards

Tokenomics

Total Supply: 100 percent distributed at launch via Pump.fun bonding curve

Liquidity: Fully community owned

Dev Wallet: Fifty percent locked for ninety days for transparency remaining fifty percent reserved for marketing exchange listings and future growth

Founder Wallet: Used for monthly contributions promo and contests

Governance

As CJET grows governance will move toward a community driven model. Holders will eventually be able to vote on which causes and skateparks receive funding each month and on future project decisions like merch drops and collaborations.

Conclusion

CJET is more than a meme coin it is a way to give back to skateboarding in real time. By combining skate culture crypto transparency and community involvement CJET creates a unique bridge between skaters and investors with everyone benefiting when the project succeeds.
